Land Development Project Announced

The zoning board of Grafton announced that it has decided to grant a development license to PJ Mathers Real Estate for the development of the now defunct waterfront plaza. The application had been bitterly debated in committee with some members of the zoning board wishing to see the site return to its natural state while others adamantly favored economic development of the area.

The waterfront plaza area has been an eyesore since 1991 when the builders of a proposed multimillion-dollar hotel and shopping complex went belly up leaving the site a half-finished disaster area. A spokesman for JP Mathers said that they are prepared to turn the fortunes of the site around. "The people of Grafton were the ones harmed by the waterfront plaza fiasco. We're planning to move in a start from scratch. We'll make the area the heart of Grafton."

Zoning board members who supported the JP Mathers application cited several reasons for their approval, including the increased tax revenue that the development would bring in, the willingness of JP Mather to hire local workers, and the success of JP Mathers's recent project, The Commons, located in nearby Breesburg. November 11
Xing Xiao Marketing
Taipei, Taiwan

Dear Sir,

I recently saw your help wanted ad on the Internet. I feel I am a very strong candidate for the position.

Although I have included my résumé with this letter, I do not feel it tells my complete story. For example, while it is easy to see that my MBA from Harvard identifies me as a highly educated marketing specialist, **I tend to think that it is my practical experience and background that make me such a perfect fit for your company.**

You see, as a younger woman, I lived and worked in Taiwan (Kaohsiung) as an English teacher at a children's English school. This experience, while not pertaining to anything I would do on my job, has given me an excellent understanding of Taiwan and the Taiwanese people. In other words, you would not need to fear "culture shock" in hiring me for the position; I have already lived and worked within the Taiwanese culture.

Further, **I also spent several years in Mainland China working as an advisor to the United Nations Economic Development Council. In this role, I came to understand a great deal about the expansion of markets in China, one of the areas your ad stressed was an important requirement.**

Finally, **my husband is a Taiwanese native and he wishes to relocate back to Taiwan. Thus, you can be assured that I am interested in this position as a long-term employment opportunity, not as a temporary position to enhance my international credentials.**

I have not included **letters of reference, but I could do so at your request.** If you wish to contact me, feel free to do so at any time. I am also fluent in Mandarin, so you need not fear communication difficulties.

One final note, I will be **in Taipei from December 15th through the 27th. If you wish interview me in person,** this would be the ideal opportunity.

Sincerely,
Karen Quentin-Chung

Progress Report

Bangladesh Call Center

May 21

Submitted by: Angela Ortiz

I have just returned from my four-day visit to the Bangladesh Call Center, and I can't say that I'm very optimistic about an August 1st opening.

The local project leader, Anand Dorma, seems capable enough but there seem to be no end to the delays. At the time of my visit, the hardware had not yet been installed. In fact, it had not yet even been delivered. Of course, even if it had, it couldn't have been installed because the wiring was also incomplete. Also, only 13 of the expected 37 (see table below) employees have been hired and none of them have begun training courses as of yet. The only thing on schedule was the interior work: the desks, chairs, and other office furniture looks OK.

My recommendation is for a greater degree of supervision for the project. Perhaps headquarters should send someone to act as on onsite coordinator. That might light a fire under Mr. Dorma and jumpstart the work. At this pace, however, I think we'll be lucky to get the call center online before October.

e-NOVA Computers Unveils Cheap-u-ter

Reggie Nedfrom, the lead designer for e-NOVA Computers, once again promises to revolutionize the computer industry with his newest offering the Cheap-u-ter Laptop. The concept behind the Cheap-u-ter is simple; produce and sell the least expensive, fully functional computer possible. The production of prototypes has already become a reality. But will they sell?

We were sent a prototype of the Cheap-u-ter here at the offices of Computer Day Magazine and were invited to put the machine through its paces. Here are our early impressions.

The unit is very light. It seems that the shell is made mostly of lightweight plastic. Also, because the unit is powered by a solid-state flash drive, there is no heavy hard disk to weigh the unit down.

The LCD screen is small and of poor quality compared with other low-end monitors. However, it is useable and functionality is the point with the Cheap-u-ter.

The unit is wireless-Internet-capable, but we were unable to get it working. Perhaps in an effort to cut costs, the quality of the wireless antenna was sacrificed. Given the prevalence of wireless Internet connections in the world today, this is an issue that ought to be addressed. Also, had we been able to connect, according to the user's manual, we could only have achieved a 10MB connection. In this broadband world, however, won't such a slow connection be a deal breaker?

All in all, the unit does deliver on its promise: it's cheap at only \$99.99. The question remains, "Is it too cheap?"

Subject: Unfair commentary

Of course, you are entitled to your opinion, but your criticism of the Cheap-u-ter is ridiculous. You disparage it for not being something it is NOT INTENDED TO BE. The unit is designed for use in the developing world, not for use by spoiled Americans.

As for your complaints about not being able to achieve a wireless connection, it is not likely a problem with the unit. It's more likely an issue with your network. I assume you use a broadband 802.11g intranet. However, the Cheap-u-ter will only connect to an 802.11b, the standard in Africa and South America. **Why don't you think before you write?**

Finally, as to your comment about the unit being TOO cheap, ask some poor school child living in a third world slum if it's too cheap. **I'm trying to bring technology to the world while you have nothing but smug criticism.**

Setting the Record Straight

We received Mr. Nedfrom's letter right after we published a story in our magazine under the headline "e-NOVA Computers Unveils Cheap-u-ter." After checking what Mr. Nedfrom said with our computer technology editor, Phil Kurz, in Brazil, we find that we owe Mr. Nedfrom an apology. Reporter Edward Wang, who joined our news team two months ago and wrote this article that inflamed Mr. Nedfrom, said he was sorry for the mistakes he made, though he did everything he could to get the story right. Computer Day Editorial Staff rang Mr. Nedfrom to express our apology, and Mr. Nedfrom gladly accepted it. He gave us more details about his Cheap-u-ter on the line, and agreed that all the detailed, correct information of Cheap-u-ter can be published in our next issue.
